

# Anthony Collins

## Bio

Young DJ/producer Anthony Collins has proved to be the rising star on the French house and techno scene. In the last year, he has accumulated signings to cutting edge labels

Born to an American father and to a French mother; he grew up both in New York and in the South of France. His first taste for music was given to him by his father who shared his passion for jazz with him and had his own recording studio in Los Angeles. It was in France that he later discovered electronic music and fell in love with it. He acquired his first pair of decks at the age of 17 and did his first gig the following year. He played in most of the major clubs on the French Riviera

To push his career a step further, Anthony left his home ground and moved to Paris. Due to hard work and by forcing his way into the shows that matter, he quickly established himself on the scene and was booked regularly to play at the city's most prestigious clubs and also abroad in famous clubs

Anthony describes his style as a mix of deep house, house ,minimal and deep tech,. He's not the type who puts one hit record after another but always blends meticulously chosen tracks with a real artistic reason to it.

Anthony Collins production skills have reached another level and the quality of his tracks is permanently increasing. Europe's finest record labels have picked up on it and have been showing a lot of interest.
